

TOTALIFT®

Automotive Batteries

Feel at ease when using TOTALIFT®.

Automotive Batteries

Benefits of the TOTALIFT® Battery Program:

- Batteries are delivered to your door
- ISO 9001
- ISO/TS 16949
- ISO 14001

We carry a full line of battery products for the industrial, automotive, commercial, marine, stationary, and specialty markets. AGM, GEL, and most starting batteries are made with state-of-the-art calcium maintenance free lead alloys for the lowest gassing rates, longest life, and highest performance.

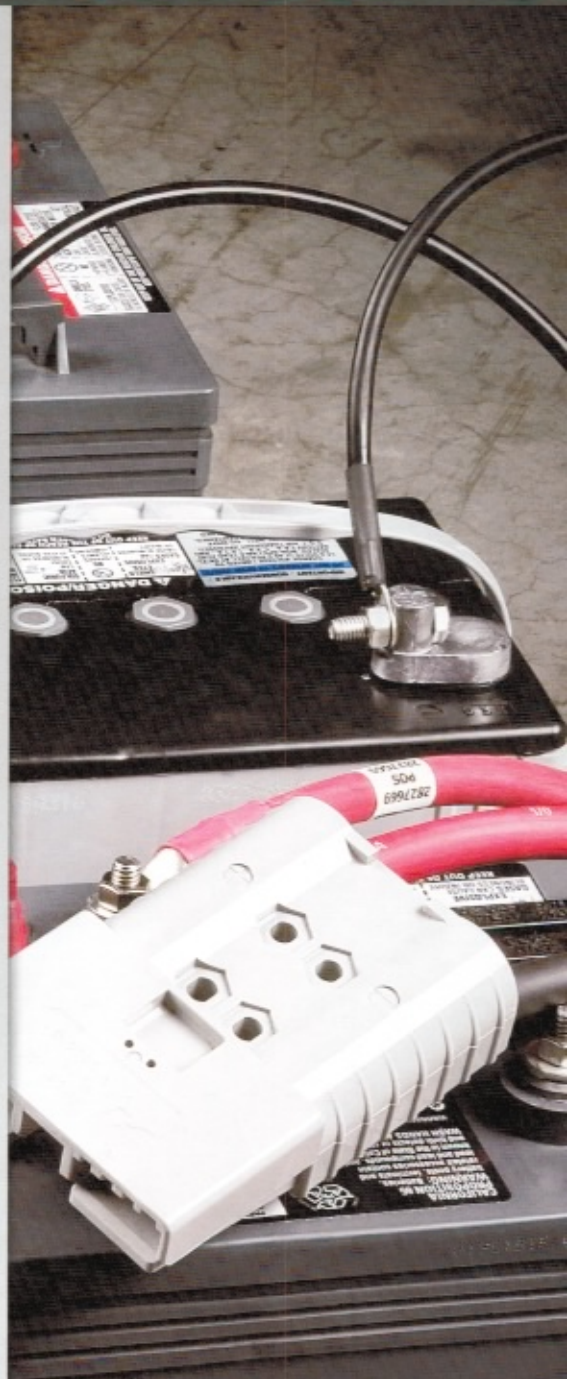

Recycling has become a significant issue for more and more industries as they realize the importance of preserving our limited natural resources. We completely recycle all three major battery components for new battery use: lead, polypropylene (plastic), and acid.

Our supplier was the first in the industry to develop a method for acid reclamation. In fact, through their innovative process, even the sulfur fumes created through recycling are turned into a liquid fertilizer for agricultural purposes. Not many recycling programs can claim that extent of environmental protection.

Authorized CLARK® dealers carry genuine CLARK® and TOTALIFT® parts for all makes and models of forklifts. Combined with dependable service and support, we are a “one stop shop” for all your service needs.
