

TOTALIFT®

Seats

The Safety Seat that reduces operator injury.

CLARK

Seats

Benefits of the Safety Seat:

CLARK® revolutionized the industry by inventing the first operator restraint system for forklifts in 1983. Now, every manufacturer has some type of restraint system available on their forklifts. The Safety Seat, pioneered by CLARK®, has long been proven effective in reducing operator injuries in a lateral tip over accident. CLARK® believes the Safety Seat is superior to that of other manufacturer's designs.

CLARK®'s solution to the problem of forklift operator injury resulting from accidental forklift overturns; CLARK® safety seats are designed by CLARK® engineers to 'wrap around' operators and, combined with a lap seat belt, protect the forklift operator during a forklift overturn. The system has been proven in both simulated and live situations, and in documented cases, has prevented serious injury.

CLARK®'s replacement seat comes in a wide range of styles to fit every application. From O.E.M. replacement seats with the CLARK® Safety Wing to the universal two piece or bucket seat, you are sure to find the right seat for your forklift.

Authorized CLARK® dealers carry genuine CLARK® and TOTALIFT® parts for all makes and models of forklifts. Combined with dependable service and support, we are a "one stop shop" for all your service needs.
